

CIVIL & RESIDENTIAL CONSTRUCTION

Direct employment within an insurer contracted to the South Australian local government sector supports the knowledge and skill base for the services developed and offered by Scaled Management Systems to the construction sector.

Scaled Management Systems appreciates and recognises the complexities of managing the dynamic and highly variable workplaces found within construction. It requires a complete understanding of systematic process control to deliver an integrated approach for introducing improvements in:-

- Client management and customer satisfaction
- Employee skill development and training in construction techniques
- Occupational Health, Safety & Welfare (OHSW) management
- Project management
- Resource management & scheduling
- Workers' Rehabilitation & Compensation management

As a registered competency assessor and trainer (#4635) with the Manufacturing and Engineering Assessment System (MEAS) of Manufacturing Skills Australia, Scaled Management Systems can assist clients in the construction sector with employee development if engineering and trades personnel need alignment with the Metal and Engineering National Competency Standards.

For additional information regarding the National Metal and Engineering Industry Competency Standards please refer to www.mersitab.com.au

Client portfolios have included:

- Adelaide Pest Control
- Regional (Eyre, Yorke Peninsulas; Mid & Upper North) and metropolitan councils
